Figure 1 displays 10 horizontal bar charts, each representing the distribution of interest in the number of children for a different country. The y-axis for each chart lists three categories: 'Total', 'Interest', and 'Total Interest'. The x-axis represents the number of children, ranging from 0 to 10. The bars are colored in shades of gray. The distribution of interest varies significantly between countries, with some showing a high concentration of interest in a specific number of children (e.g., 2 or 3) and others showing a more spread-out distribution.
